

Today's young guns demand the same performance and features as found on the larger frames usually reserved for older riders.

Our EXL20 model features a long list of design specifications that recognize this trend and cater for these demands.

From the Oversize Double Butted 6061-T6 Alloy tubing, used throughout the frame, to the Disc-Specific forged dropouts this frame screams PRO-LEVEL!

- 20.3" (515mm) Toptube
- Oversize Butted 6061-T6 Alloy Tubing
- Oversize 1.1/8" Headtube with Internal Bearings
