

Oversize and Tapered Alloy 6061 Fork for riders that prefer the feel and price of Alloy compared to Carbon.

For the same reason that high-end Alloy Race frames still exist, we think there is a place for a matching Alloy Race fork to suit these builds.

This is the OS20 version of our PRO fork and has been lengthened to 332mm to ensure ample tire clearance whilst preserving the frame geometry of OS20-specific frames.

Note : includes CNC Alloy Compression Cap

Key Spec:

- Axle Length: 116mm
- Tyre Clearance: 83mm
- Steerer Tube: Tapered 1.1/8 ~ 1.5
- Crown Width: 56mm

AXLE TO CROWN // 332mm

FORK SPACING // 100 x 20mm

WEIGHT // 858g
